Electric Mobility Niches Fund

Report (January' 21)

ICE: Internal Combustion Engine

Mr Diess, CEO of Volkswagen, has recently publicly affirmed *“By 2020-2021 it will be difficult to take a buying decision against electric cars, because they offer so many convincing points...”* (Wolfsbusg, 16/11/2018)

and at the same time the industry and the experts forecast just 17% EVs penetration rate in 2025 (up from 11% in 2018)

full stop

“The future influences the present”
Friedrich Nietzsche

Note to readers

The electric mobility is a sector where huge resources are now concentrating all around the world. We try to depict its actual state of art and the likely evolution, relying mostly on the contacts with the players, consultants and researchers and on specialised press and publications. We have used the 2018 report as a base, updating data and forecast where necessary.

The report follows the power point presentation, drilling down each point of it to provide the reader a deeper understanding of the matter. To make the report easy to look up, the key words of the presentation have been drawn blue in the report.

Summary

The two great revolutions in the automotive sector	6
Similarities between the two revolutions	17
Electric mobility: Where are we?	21
Electric Mobility: where are we going? Different opinions	27
Attractiveness of EVs vs ICE vehicles. where are we? Close to surpassing... ..	31
Leaseplan TCO analysis	32
ADAC TCO ANALYSIS	33
Actual Total Cost of Ownership: Niche AM	35
Subsidies	40
Purchase cost	45
Autonomy is no longer an issue	49
... more to come!	50
Next Steps	58
Which battery for the future?	61
Lithium batteries and commodities	66
EVs battery degradation	69
Giving a second life to batteries	72
Charging network ubiquity still inadequate but growing fast	76
Charging speed technology improving dramatically	93
EVs performance cannot be matched	100
EVs provide a far better driving comfort	101
EVs model attractiveness: about 70 EV models available in 2018 but just few were really sexy; in 2020 more than half the model available are sexy	104
by 2022 more than 50 new models, mostly sexy	104
Segment: City cars Economy	107
Segment: City cars Luxury	109
Segment: Mid-Size Economy	115
Segment: Mid-Size Luxury	118
Segment: SUV Economy	132
Segment: SUV Luxury	147
Segment: Sportcar	163
Segment: Van	174
